2015 Neuroscience Publications
Delivering Cutting-Edge Peer-Reviewed Research Advances and Breakthrough Treatment Developments

Journal of Neurotrauma
John T. Povlishock, PhD
W. Dalton Dietrich, III, PhD, Deputy Editor
ISSN: 0897-7151 Print • 1557-9042 Online
The premier journal exclusively focused on the clinical and laboratory investigation of traumatic brain and spinal cord injury. Coverage focuses on basic pathobiology of injury while examining ways to improve early management, long-term care, and recovery. The Official Journal of the National Neurotrauma Society and the International Neurotrauma Society.

Brain Connectivity
Christopher P. Pawela, PhD
Bharat B. Biswal, PhD
ISSN: 2158-0014 Print • 2158-0022 Online
This essential journal provides critical research at the systems and network levels on brain mapping, modeling, new imaging modalities, and the translation of research from the lab to the clinic to recognize and treat a broad range of neurodegenerative and psychiatric disorders.

Therapeutic Hypothermia and Temperature Management
W. Dalton Dietrich, III, PhD
ISSN: 2153-7658 Print • 2153-7933 Online
The only peer-reviewed journal exploring all aspects of this innovative new technology for critical care situations. The Journal provides a multidisciplinary forum to ensure that therapeutic hypothermia is well understood and used to improve patient outcomes in cardiac arrest, traumatic brain and spinal cord injury, stroke, myocardial ischemia, and other emergency situations.
