GEN (Genetic Engineering & Biotechnology News)

John Sterling

Vol 36 • 21 issues

Genetic Engineering & Biotechnology News (GEN) is the field’s leading source for breaking news and analysis of the latest developments in life science R&D, from biomarker discovery through drug development, biomanufacturing, and commercialization.

Available on the fully searchable online platform:
- COUNTER 3 compliance
- Unlimited, simultaneous access
- Multiple ways of searching and cross-referencing
- Authenticated mobile access via Liebert for Mobile (L4M)
- 21 issues per year
- Complete archival content: coverage on drug discovery, bioprocessing, OMICS, biobusiness, and translational medicine

GEN’s exclusive content includes industry-standard tutorials and technical articles in bioprocessing, assays, and drug discovery; feature articles on emerging technologies; product roundups and regional biofocus articles on biotech hotbeds; as well as reports from key scientific and industry meetings.

Barry J. Byrne, MD, PhD, Deputy Editor, U.S.
Guangping Gao, PhD, Human Gene Therapy Editor
Hildegard Bünning, PhD, Methods Editor
James M. Wilson, MD, PhD, Clinical Development Editor

**Human Gene Therapy** is the only multidisciplinary journal that focuses on the human aspect of gene therapy, providing end-to-end coverage of the research driving today’s explosion of gene therapy advances. The Journal is divided into three parts providing comprehensive access to essential research, methods, and applications that are moving gene therapy products into effective therapeutics for treating human disease.

**Human Gene Therapy**, the flagship, provides 12 issues of original investigations into the transfer and expression of genes and improvements in vector development, delivery systems, and animal models, including cancer, AIDS, heart disease, genetic disease, neurological disease, and more.

**Human Gene Therapy Methods**, a bimonthly journal, publishes technological advances in cell and gene therapy that promote the development of gene therapy products into successful therapeutics. The Journal breaks new ground as the first to exclusively focus on the applications of gene therapy to product testing and development.

**Human Gene Therapy Clinical Development**, a quarterly journal, serves as a venue for publishing data relevant to the regulatory review and commercial development of cell and gene therapy products.

Official Journal of nine international societies including the European Society for Gene and Cell Therapy.

Tissue Engineering, Parts A, B, & C

Antonios G. Mikos, PhD
Peter C. Johnson, MD
John P. Fisher, PhD (Part B)
John A. Jansen, DDS, PhD (Part C)

Vol 22 • 42 issues

This preeminent, internationally renowned journal focuses on the engineering and applications of new biologic tissues, with the goal of bioengineering replacement of tissue and organs. Multidisciplinary in scope, Tissue Engineering is divided into three parts bringing together the principles of engineering and life sciences in tissue development and regenerative medicine.

Tissue Engineering, Part A, the flagship, provides 24 issues of in-depth coverage on novel biomaterials, nanobiotechnology, cell transplantation, polymer scaffolding, biohybrid organs, blood substitutes, and much more.

Tissue Engineering, Part B: Reviews publishes 6 issues that meet the urgent need for high-quality review articles and publishes critical discussions, analyses, and concise summaries of research to assess where we are now, and future directions.

Tissue Engineering, Part C: Methods provides 12 issues to present more procedures and protocols that will be adopted by the tissue engineering community as the research is translated into clinical applications. Authoritative articles bring consistency to the research methods employed and help the field grow and mature.

The Official Journal of the Tissue Engineering and Regenerative Medicine International Society.

Liebert Open Access publishing program provides comprehensive open access solutions for your institution

Open Option
Liebert Open Option allows authors to publish open access (OA) in all of our traditional journals. OA articles are made freely available online without restriction, published with an OA license, and authors retain copyright. Publishing with Open Option is the best route for authors to comply with institutional OA policies.

Open Access Journal Portfolio
Liebert Open Access features our expanding portfolio of OA journals publishing research in all areas of science, technology, and medicine. All OA journals are freely available online, peer reviewed, and indexed. All articles are published with an open access license so that authors can easily comply with institutional OA policies without restriction. Titles in the portfolio include:

- BioResearch Open Access
- Cannabis and Cannabinoid Research
- Case Reports in Pancreatic Cancer
- Healthcare Transformation
- Journal of Endourology Case Reports
- Transgender Health

Supporting Open Access for Your Investigators
Liebert Author Advocacy Program (LAAP)
Authors who choose to publish with Liebert Open Access are asked to pay an article publication charge (APC) per published article to receive the benefits of OA and cover the cost of publication. LAAP is designed for academic and research institutions to remove some of, or the entire financial costs for their researchers. LAAP features flexible membership options to fit your institutional requirements and budget needs. For more information on LAAP please email laap@liebertpub.com or contact your sales representative.
