Call for Papers: Applied In Vitro Toxicology

Editor-in-Chief: James M. McKim, PhD, DABT; *IonTox*, LLC

Applied In Vitro Toxicology provides the latest peer-reviewed research on the application of alternative *in vitro* testing methods for predicting adverse effects in the pharmaceutical, chemical, and personal care industries. The Journal addresses important issues facing the various chemical industries, including regulatory requirements; the reduction, refinement, and replacement of animal testing; new screening methods; evaluation of new cell and tissue models; and the most appropriate methods for assessing safety and satisfying regulatory demands.

Benefits of submitting include:

- ◆ Fast and user-friendly electronic submission
- ◆ Rapid peer review and publication
- ◆ A diversity of article types
- ◆ Maximum exposure: readership in more than 170 countries worldwide
- ◆ Competitive Author Benefits Program
- ◆ Open access options available
