Call for Papers: Autism in Adulthood

Editor: **Christina Nicolaidis**, MD, MPH; *Portland State University; Oregon Health & Science University*

A*utism in Adulthood* is the home for research and scholarship on the most pressing issues affecting adults on the autism spectrum, from emerging adulthood to later life. *Autism in Adulthood* welcomes original research, in-depth analysis, and inter-professional dialogue from multiple disciplines, professions, methodologies, and paradigms.

Coverage includes:

- Physical and mental health of adults on the autism spectrum
- Employment, housing, education, community participation, economic well-being, and quality of life
- Sexuality, gender identity, relationships, and caregiving
- Autistic intelligence, sensory processing, communication, executive functioning, and flexibility
- Healthcare and social services
- Identification, treatment, and accommodation of co-occurring conditions
- Basic science research with implications for autism in adulthood
- Biological, neurological, psychological, cognitive, emotional, behavioral, and social changes with aging
- Policies and programs affecting adults on the autism spectrum
- Human and disability rights and advocacy
- Portrayal of adult autism in society and the media
- Ethical issues in research, practice, or policy on autism in adulthood
- Intersectionality of autism and race, ethnicity, nationality, gender, sexual orientation, disability, class, trauma, discrimination, and other social determinants of health
- Transitions across the lifespan, including transitions to and through adulthood
- Insights about autism from adults on the spectrum
- Participatory approaches to research, practice, and policy, in partnership with individuals on the spectrum
- Methodological advances for conducting research on autism in adulthood
